

DESIGN-001 - Syrka Visual Identity & Design System Constitution

Status: Constitutional Design Specification

Version: 1.0

Date: 2026-07-08

Builds upon: Product Suite; UX-001 - Product Experience Architecture

Canonical visual reference: attached Syrka logo and brand concept

Decision owners: Brand, Product Design, Design Systems, Frontend Platform, Marketing Design

1. Brand DNA

Syrka is the operating system for human capability. Its brand must feel institutional enough for universities and governments, intelligent enough for AI-native capability inference, and human enough for students building their futures.

The existing mark is not redesigned by this specification. It remains the canonical symbol: an open book, a gateway, convergence, and synthesis. Those meanings expand into the design system as follows:

| Logo meaning | Product meaning | Visual design implication |

|---|---|---|

| Open Book | knowledge, learning, evidence | open layouts, generous margins, legible typography |

| Gateway | opportunity, mobility, access | portal-like cards, pathways, framed destination states |

| Convergence | evidence, capability, market signals meeting | graph lines, subtle intersections, connected layouts |

| Synthesis | integration into explainable capability | layered cards, provenance stacks, calm summaries |

Mission

To transform learning, evidence, and human experience into trusted capability intelligence that helps people move toward meaningful opportunities.

Vision

A global human capability infrastructure where every learner can prove what they can do, every institution can understand capability formation, every employer can hire based on evidence, and every government can plan workforce mobility with trust.

Personality

- Intelligent: precise, structured, never vague.
- Calm: quiet confidence instead of loud persuasion.
- Institutional: suitable for universities, governments, and official documents.
- Human: supports ambition without reducing people to scores.
- Evidence-driven: recommendations are always justified.
- Premium: restrained, refined, and durable.

Voice and emotional tone

Syrka speaks like a trusted advisor: concise, factual, explanatory, and respectful. It avoids hype, gamification excess, and manipulative urgency. The emotional tone should be reassuring: "Your future is understandable, evidence-backed, and actionable."

Brand promise

Syrka helps people understand what they can credibly do, why that belief is justified, and where

that capability can create value.

Core values

1. Evidence before assertion.
2. Capability before credentials.
3. Explainability before automation.
4. Trust before growth.
5. Mobility before gatekeeping.
6. Human agency before algorithmic authority.
7. Timeless clarity before trend-driven novelty.

Desired perceptions

| Audience | Desired perception |

|---|---|

| Investors | Syrka is a category-defining infrastructure company, not a feature app. |

| Universities | Syrka is academically serious, interoperable, and institution-safe. |

| Students | Syrka helps me see my potential and prove it with evidence. |

| Employers | Syrka reduces hiring uncertainty with explainable capability evidence. |

| Governments | Syrka supports workforce planning, mobility, and national strategy responsibly. |

2. Visual Philosophy

Minimalism

Minimalism is required because Syrka handles complex ideas: ontology, evidence, capability graphs, recommendations, passports, and policy analytics. The interface must reduce cognitive load by showing only what matters now, with progressive disclosure for deeper evidence.

Evidence-first design

Every visual pattern should answer: "What supports this claim?" Capability cards, recommendations, and passport claims must show evidence count, confidence, provenance, and explanation access. Evidence is not hidden in footnotes; it is a first-class UI layer.

Enterprise appearance

Syrka must be credible in boardrooms, ministries, universities, and employer procurement processes. The visual language should use disciplined typography, restrained color, strong alignment, consistent spacing, and official-document quality.

Calm interfaces

Capability inference affects identity and opportunity. The product must not feel like a social feed, casino, or consumer growth app. Use quiet transitions, neutral backgrounds, deliberate status colors, and clear review paths.

Typography and whitespace

Typography carries institutional trust. Whitespace creates room for reasoning. Dashboards should not be crowded; they should guide scanning from summary to evidence to action.

Trustworthy AI

AI appears as an analytical layer, never as magic. AI-generated summaries must include evidence references, confidence, uncertainty, model/run metadata where appropriate, and a path to challenge or review.

3. Logo System

The Syrka logo consists of a geometric monoline symbol and the SYRKA wordmark. The concept image establishes a black/white, high-contrast, premium identity with wide letter spacing and applications for app icon, stamp/seal, passport, document, and favicon.

Primary logo

- Use the full symbol + wordmark lockup for corporate, landing, investor, institutional, and official contexts.
- Maintain the wordmark’s wide tracking and geometric calm.
- Use on black, near-black, white, or neutral backgrounds only.

Secondary logo

- Use symbol-only when space is constrained: app icon, favicon, mobile navigation, compact sidebar, seal, social avatar.
- Use stacked lockup for splash screens, official reports, and presentation covers.

Monochrome versions

- Primary monochrome: white logo on black/ink background.
- Secondary monochrome: black/ink logo on white/parchment background.
- Avoid multicolor logo treatments.

Clear space and minimum size

- | Asset | Minimum size | Clear space |
- |---|---:|---|
- | Full logo | 144px wide digital / 38mm print | symbol height on all sides |
- | Symbol | 24px digital / 8mm print | half symbol width on all sides |
- | Favicon | 16px, 32px, 48px | no additional marks |
- | App icon | 1024px source | centered symbol, 18% inset |
- | Seal | 28mm print / 96px digital | outer ring thickness x 4 |

Incorrect usage

Do not stretch, rotate, recolor with gradients, add shadows, outline the wordmark, place over busy imagery, compress letter spacing, add decorative ornaments, alter stroke widths, redraw the symbol, or combine it with unrelated icons.

Application rules

- | Application | Rule |
- |---|---|
- | Passport branding | symbol centered above passport title; use seal variant for verification. |
- | Official documents | symbol + wordmark at top; seal watermark allowed at 4-8% opacity. |
- | Certificates | use seal/stamp lockup; include verification QR aligned to grid. |
- | Presentations | black or ivory cover, large symbol, restrained title typography. |
- | Social media | symbol-only avatar; wordmark in banner with high whitespace. |
- | Email signatures | small full logo, name/title, institutional contact. |

- | Merchandise | symbol-only preferred; no slogans unless official. |
- | Conference booths | large symbol, minimal copy, capability/evidence/gateway messaging. |
- | University partnerships | co-brand with equal clear space and neutral divider. |

4. Color System

Syrka’s color system is nearly monochrome by default. Color is semantic, not decorative. The core brand uses black, white, graphite, silver, and warm institutional neutrals. Accent colors are muted and reserved for state, evidence, capability, confidence, and role differentiation.

Light mode tokens

- | Token | Hex | Purpose | Accessibility / usage |
- |---|---|---|---|
- | --color-ink-950 | #050505 | primary text, logo, premium surfaces | maximum contrast |
- | --color-ink-900 | #111111 | headings, dark UI blocks | use sparingly |
- | --color-ink-700 | #2E2E2E | body text | AA on light |
- | --color-stone-500 | #71716C | muted text | use for secondary, not critical |
- | --color-stone-300 | #C8C7C0 | borders/dividers | low emphasis |
- | --color-stone-100 | #F4F3EF | page background | warm institutional neutral |
- | --color-white | #FFFFFF | surfaces/cards | clean content fields |
- | --color-silver | #E7E5DE | official document surfaces | certificates/passport |
- | --color-gold-500 | #B89B5E | verified/passport accent | use only for official trust |
- | --color-blue-600 | #2F5F8F | information/links | restrained, accessible |
- | --color-green-600 | #2F6B4F | success/verified | evidence verified |
- | --color-amber-600 | #9A6A20 | warning/review needed | do not overuse |
- | --color-red-600 | #8E2F2F | danger/revocation/error | high severity only |
- | --color-purple-600 | #5D4A7A | AI/reasoning layer | subtle intelligence marker |

Dark mode tokens

- | Token | Hex | Purpose | Accessibility / usage |
- |---|---|---|---|
- | --color-bg-dark | #050505 | primary dark background | mirrors logo concept |
- | --color-surface-dark | #111111 | cards/panels | subtle contrast |
- | --color-surface-raised-dark | #181818 | elevated cards | no heavy shadows |
- | --color-border-dark | #303030 | dividers | hairline borders |
- | --color-text-dark | #F6F5F0 | primary text | strong contrast |
- | --color-muted-dark | #A8A8A0 | secondary text | AA where possible |
- | --color-gold-dark | #D4BE7F | verified/passport accent | restrained official highlight |
- | --color-blue-dark | #78A6D1 | information/links | accessible on dark |
- | --color-green-dark | #78B892 | success | accessible on dark |
- | --color-amber-dark | #D0A04F | warning | accessible on dark |
- | --color-red-dark | #D17B7B | danger | accessible on dark |
- | --color-purple-dark | #A997CA | AI/reasoning | accessible on dark |

Semantic color families

- | Family | Use | Color direction |
- |---|---|---|
- | Capability | maturity, capability state, skill clusters | neutral + muted blue/green; avoid rainbow graphs |
- | Evidence | evidence status, provenance, review | graphite, green verified, amber review, red revoked |
- | Confidence | confidence bands | monochrome structure + green/amber/red thresholds |
- | Recommendation | next actions and Odyssey | blue for information, purple for AI assistance |
- | Odyssey | pathways and milestones | blue/stone lines with gold completion markers |

Passport	verified identity/capability	black/ivory/gold/seal treatment
Government	aggregate dashboards	neutral, blue, amber; avoid individual-level colors
Employer	hiring/match flows	neutral, green for verified, blue for match context
Faculty	review/intervention	neutral, amber for attention, green for verified
Student	growth and journey	neutral, blue and green accents

5. Typography

Font system

Role	Recommended font	Fallback
Primary UI	Inter or Geist Sans	system-ui, -apple-system, Segoe UI, sans-serif
Display / brand headlines	Shne, Inter Display, or Geist	Inter, system-ui
Code / technical data	JetBrains Mono or IBM Plex Mono	ui-monospace, SFMono-Regular, monospace
Numbers/tables	Tabular figures in primary font	font-variant-numeric: tabular-nums

The wordmark remains its own brand asset and should not be recreated with the UI font.

Type scale

Token	Size	Line height	Use
text-xs	12px	16px	captions, metadata
text-sm	14px	20px	secondary UI text
text-base	16px	24px	body and forms
text-lg	18px	28px	emphasized body
text-xl	20px	30px	card titles
text-2xl	24px	32px	page sections
text-3xl	32px	40px	page titles
text-4xl	44px	52px	landing hero
text-5xl	56px	64px	rare display

Typographic rules

- Use letter spacing sparingly; reserve wide tracking for brand, labels, and official document headings.
- Body copy should be readable, not compressed.
- Tables use tabular numbers and clear row rhythm.
- Captions explain provenance and confidence; never hide critical uncertainty in low-contrast text.
- Long-form reports use a comfortable measure: 68-78 characters.

6. Iconography

Syrka icons derive from the logo's monoline geometry: precise, thin, angled, open, and symmetrical where possible.

Property	Rule
Stroke width	1.5px at 24px; 2px only for small dense contexts
Style	outline by default; filled only for selected/critical state
Corners	subtle radius, no cartoon rounding
Perspective	flat orthographic, no skeuomorphism
Motion	icons may draw in with short line animations, never bounce

| Grid | 24px base with optical alignment |

Semantic icon examples

| Concept | Icon direction |

|---|---|

| Learning | open book/gateway line derived from mark |

| Capability | node with evidence-backed check path |

| Evidence | document/artifact with provenance dot |

| Passport | booklet/seal/QR motif |

| Career | pathway/gateway arrow, not corporate ladder cliché |

| Employer | building + verified capability nodes |

| Government | column/seal/aggregate chart |

| Research | paper/network citation |

| Portfolio | curated artifact stack |

| Recommendations | compass/path with evidence dot |

| Analytics | structured chart, minimal color |

| AI | reasoning spark inside bracket, not robot face |

| Notifications | quiet bell/dot |

| Settings | geometric sliders |

7. Design Tokens

Spacing

Use a 4px base grid with intentional whitespace.

| Token | Value | Use |

|---|---|---|

| space-0 | 0 | flush alignment |

| space-1 | 4px | tight icon gaps |

| space-2 | 8px | compact groups |

| space-3 | 12px | form gaps |

| space-4 | 16px | card internal spacing |

| space-5 | 20px | section grouping |

| space-6 | 24px | dashboard grid gaps |

| space-8 | 32px | page sections |

| space-10 | 40px | large content separation |

| space-12 | 48px | hero/report spacing |

| space-16 | 64px | major page bands |

| space-24 | 96px | landing sections |

Radius, elevation, opacity, animation

| Token | Value | Use |

|---|---|---|

| radius-sm | 6px | inputs, badges |

| radius-md | 10px | cards, dialogs |

| radius-lg | 16px | major panels |

| radius-xl | 24px | app icon / hero surfaces |

| shadow-subtle | 0 1px 2px rgba(0,0,0,.06) | light card lift |

| shadow-panel | 0 12px 32px rgba(0,0,0,.10) | dialogs/menus |

| opacity-disabled | 0.45 | disabled controls |

| duration-fast | 120ms | hover/focus |

| duration-base | 180ms | small transitions |

| duration-slow | 280ms | page/modal transitions |
| ease-standard | cubic-bezier(.2,.8,.2,1) | default |

Grid and breakpoints

Token	Value
container-sm	640px
container-md	768px
container-lg	1024px
container-xl	1200px
container-2xl	1440px
breakpoint-sm	640px
breakpoint-md	768px
breakpoint-lg	1024px
breakpoint-xl	1280px
breakpoint-2xl	1536px

8. Layout Philosophy

Landing pages

Use strong negative space, a clear hero claim, a quiet visual of evidence-to-capability transformation, and focused conversion points. Avoid crowded SaaS collage sections.

Dashboards

Dashboards answer the user's next question. Use one primary summary region, one action region, one evidence/status region, and a low-noise activity feed. Avoid more than 5-7 major widgets above the fold.

Forms

Forms are official and calm. Use clear labels, inline validation, minimal fields per step, and explanations for sensitive data.

Tables

Tables should support enterprise review: sticky headers, clear filters, density options, keyboard navigation, and export where appropriate.

Cards

Cards are evidence containers. Every important card has title, summary, status, evidence/provenance, primary action, and optional explanation.

Graphs and timelines

Capability/knowledge graphs use structure first: spacing, edge weight, grouping, labels, and focus states. Color is secondary. Timelines show chronology and provenance with clear event/evidence distinction.

Passport and portfolio

Passport uses official-document logic: ivory/black/gold, seal, QR, version, expiry, verification

status, and redaction controls. Portfolio is more expressive but still restrained.

9. Component Language

Component	Purpose	States	Accessibility	Variants / behavior
Button	trigger clear action	default, hover, focus, active, loading, disabled	visible focus, semantic button	primary, secondary, ghost, danger, link
Input	collect data	default, focus, error, disabled, success	label required, error text	text, textarea, search, date, select
Dropdown	choose from known set	open, selected, disabled	keyboard, aria-expanded	simple, searchable, multi-select
Card	contain related information	default, hover, selected, loading	semantic headings	standard, evidence, capability, passport
Capability Card	summarize capability state	emerging to revoked	confidence announced textually	evidence count, maturity, review action
Evidence Card	show support/provenance	pending, verified, disputed, revoked	source and status text	artifact preview, review trail
Recommendation Card	explain next action	new, accepted, dismissed, expired	reason and confidence text	Odyssey, job, learning, portfolio
Passport Card	official claim summary	active, shared, expired, revoked	verification status	QR, version, redaction
Timeline	sequence events/evidence	selected, filtered	ordered list fallback	learning/evidence/passport timelines
Graph Viewer	capability/knowledge graph	pan, focus, inspect	table/list fallback	force, hierarchy, path view
Chart	visualize metrics	hover, focus, empty	alt summary	line, bar, heatmap, network
Search	discover people/content	typing, results, empty	keyboard-first	global, scoped, command palette
Filter	narrow data	active, clearable	labels	chips, panels, saved filters
Navigation	move across product	active, collapsed	landmark roles	sidebar, topbar, mobile tab
Dialog	focused decision	open, loading	focus trap	confirm, form, evidence inspector
Notification	status update	unread, read, actioned	polite/live region	toast, inbox, banner
Badge	semantic label	default, emphasis	text + color	status, role, confidence, evidence
Progress Bar	show completion	determinate, indeterminate	value text	Odyssey, onboarding, review
Tabs	switch panels	active, disabled	keyboard	underlined, segmented
Accordion	progressive disclosure	open/closed	aria controls	evidence details, policy notes
Sidebar	app structure	expanded/collapsed	landmarks	role-specific navigation
Header	page identity/actions	fixed/static	headings	page, report, dashboard
Footer	legal/context	static	navigable links	marketing, app, document

10. Data Visualization

Syrka visualization should make complex relationships understandable without turning capability into entertainment.

Visualization	Design rule
Capability graph	grouped by ontology domain; edge thickness for evidence strength; confidence visible in labels/tooltips
Knowledge graph	clear hierarchy and filters; selected node opens evidence drawer
Confidence indicator	numeric + band + explanation; never color-only
Evidence timeline	chronological, source-labeled, review status visible
Career pathway	step path with gaps, prerequisites, and next actions
Labour analytics	aggregate only; use subdued charts and clear methodology notes
Institution dashboard	cohort trends, assessment quality, evidence review workload

Government analytics	country/sector aggregates; strong privacy cues
Network visualizations	limited node count by default; progressive expansion
Trend charts	restrained line/bar charts; annotations for policy/market events

11. Motion System

Motion communicates continuity and state. It never distracts.

Motion	Rule
Hover	120ms subtle border/surface change
Loading	skeletons for data surfaces; spinner only for short actions
Transitions	180ms standard; preserve spatial continuity
Page navigation	fade/slide 8-12px max
Micro-interactions	use for confirmation, not delight theater
Graph animations	draw edges on load; reduce for large graphs
Timeline animations	reveal new events gently
Modal behavior	fade overlay + scale 98% to 100%
Reduced motion	disable transform animations, keep opacity changes only

12. Imagery

Asset type	Rule
Photography	real universities, laboratories, people working; natural light; no stock clichs
Illustrations	abstract diagrams only; avoid cartoon startup people
Icons	monoline geometric system
Diagrams	precise, grid-based, explain system flows
3D usage	minimal; only for premium passport/object renders if needed
Patterns	derive from logo angles/convergence lines at low opacity
Textures	subtle paper/grain for official documents only
Backgrounds	neutral, spacious, never busy behind text

13. Accessibility

- Meet WCAG AA minimum; target AAA for primary text where feasible.
- All interactive controls require visible focus states.
- Never rely on color alone; pair with labels, icons, and patterns.
- Support reduced motion, high contrast, screen readers, keyboard navigation, and logical heading structure.
- Design for localization, RTL, long names, multilingual labels, and low-bandwidth contexts.
- Graphs require list/table fallbacks and textual summaries.
- Confidence and AI explanations must be readable by assistive technologies.

14. Design Inspiration

Syrka may learn from refined platforms but must not copy them.

Reference	Adopted principle	Avoid copying
Apple	restraint, premium negative space, hardware-like polish	consumer gloss, excessive spectacle
Stripe	clarity, developer trust, documentation quality	bright gradient-heavy marketing language
Linear	speed, alignment, typography, command UX	overly dark startup aesthetic
GitHub	developer familiarity, trust in technical artifacts	dense legacy UI patterns
Palantir	institutional seriousness, analytical dashboards	intimidating surveillance aesthetics

| Notion | flexible information architecture | casual blocks that weaken official trust |
| Arc Browser | elegant product confidence, subtle motion | novelty-first interaction models |

15. Platform Applications

Surface	Design adaptation
Landing website	premium, spacious, logo-led, evidence-to-opportunity story
Student dashboard	calm path, capability summary, evidence, next action
Faculty dashboard	review queues, cohort signals, curriculum mapping
Employer portal	capability search, evidence review, passport verification
Government analytics	aggregate dashboards, policy notes, privacy emphasis
Portfolio website	polished but personal, evidence-backed project presentation
Job Passport	official document language, versioning, seal, QR, verification
Reports	institutional typography, strong tables, restrained charts
Certificates	seal/stamp, verified data, QR, minimal ornament
Official documents	black/ivory, generous margins, formal hierarchy
Emails	concise, white/neutral surfaces, clear actions
Mobile app	focused next actions, passport/evidence access, compact navigation
Desktop app	analytics-heavy workflows and graph exploration
Tablet	review, presentation, and classroom workflows

16. Figma Design System

Page	Frames / organization
Cover	logo, version, brand promise, canonical reference
Brand	mission, logo meanings, usage, incorrect usage
Colors	light/dark palettes, semantic tokens, accessibility samples
Typography	scale, specimens, tables, report examples
Icons	grid, icon set, semantic examples, do/don't
Spacing	grid, containers, page rhythm, responsive examples
Tokens	variables for color, type, radius, shadow, motion
Components	buttons, forms, cards, navigation, dialogs, charts
Student	dashboard, evidence, capability, Odyssey, passport
Faculty	course, review queue, curriculum mapping, analytics
Employer	search, candidate, passport verification, job pipeline
Government	aggregate analytics, corridors, policy brief
Portfolio	profile, project pages, share states
Passport	document, QR/share, verification states
Landing	homepage, product, investor, university pages
Navigation	sidebar, topbar, mobile, command palette
Responsive	desktop/tablet/mobile rules
Prototype	key flows from UX-001
Documentation	component rules, accessibility, implementation notes

17. Google Stitch Readiness

Use these prompts as production-ready starting points. Each prompt assumes the existing Syrka logo and monoline mark are provided as assets.

Landing page prompt

Create a premium enterprise SaaS landing page for Syrka, the operating system for human capability. Use a near-monochrome palette inspired by the provided black-and-white geometric

Syrka logo. The design should feel like Apple-level restraint, Stripe-level clarity, and institutional trust suitable for universities and governments. Use generous whitespace, precise typography, no trendy gradients, and subtle line motifs derived from the logo's open book/gateway/convergence shape. Sections: hero, evidence-to-capability explanation, platform modules, university/employer/government trust, Job Passport preview, CTA.

Student dashboard prompt

Design a calm student dashboard for Syrka. Visual style: premium monochrome with muted blue/green semantic accents, spacious cards, precise typography, evidence-first AI. Main cards: capability summary, current Odyssey milestone, evidence awaiting review, Job Passport status, recommendations with confidence and evidence count. Show AI as explainable analysis, not a chatbot mascot. Include sidebar navigation and dark/light mode compatibility.

Faculty dashboard prompt

Design a faculty dashboard for reviewing student capability evidence. Use restrained enterprise styling, clear tables, review queues, cohort analytics, curriculum mapping, and evidence verification cards. Highlight urgent items with muted amber, verified evidence with muted green, and keep the interface calm and uncluttered.

Employer dashboard prompt

Design an employer portal where recruiters search candidates by verified capability. Include capability-first search filters, candidate match cards, passport verification panel, evidence drawer, hiring pipeline, and consent indicators. Use professional black/ivory/graphite styling with green verified states and gold passport trust accents.

Government dashboard prompt

Design a government workforce analytics dashboard for aggregate capability gaps, strategic sectors, labour market signals, and mobility corridors. Use privacy-preserving aggregate visuals, muted maps/charts, methodology notes, and official document styling. Avoid consumer dashboard clutter.

Capability screen prompt

Design a capability detail screen showing what a person can credibly do. Include maturity, confidence, supporting evidence, conflicting evidence, ontology mapping, graph path, reasoning explanation, review history, and next recommended actions. Use structure first, color second.

Job Passport prompt

Design a digital Job Passport with official document aesthetics: ivory surface, black typography, Syrka symbol, seal, QR verification, version number, expiry, privacy controls, capability claims, evidence links, and share/revoke actions.

18. Claude Sonnet Readiness

Tailwind tokens

```
export const syrkaTheme = {  
  colors: {  
    ink: { 950: '#050505', 900: '#111111', 700: '#2E2E2E' },
```

```

stone: { 100: '#F4F3EF', 300: '#C8C7C0', 500: '#71716C' },
white: '#FFFFFF',
silver: '#E7E5DE',
gold: { 500: '#B89B5E' },
blue: { 600: '#2F5F8F' },
green: { 600: '#2F6B4F' },
amber: { 600: '#9A6A20' },
red: { 600: '#8E2F2F' },
purple: { 600: '#5D4A7A' }
},
borderRadius: { sm: '6px', md: '10px', lg: '16px', xl: '24px' },
spacing: { 1: '4px', 2: '8px', 3: '12px', 4: '16px', 6: '24px', 8: '32px', 12: '48px', 16: '64px' }
}

```

CSS variables

```

:root {
  --background: #F4F3EF;
  --foreground: #050505;
  --card: #FFFFFF;
  --card-foreground: #111111;
  --border: #C8C7C0;
  --muted: #71716C;
  --primary: #050505;
  --primary-foreground: #FFFFFF;
  --success: #2F6B4F;
  --warning: #9A6A20;
  --danger: #8E2F2F;
  --info: #2F5F8F;
  --ai: #5D4A7A;
  --verified: #B89B5E;
}

.dark {
  --background: #050505;
  --foreground: #F6F5F0;
  --card: #111111;
  --card-foreground: #F6F5F0;
  --border: #303030;
  --muted: #A8A8A0;
}

```

shadcn/ui customization

- Use neutral base theme, then override tokens with Syrka variables.
- Buttons: black primary, outline secondary, ghost tertiary, red destructive.
- Cards: thin border, subtle shadow, rounded-md or rounded-lg.
- Dialogs: restrained overlay, official typography, clear focus trap.
- Badges: semantic text + subtle background; never color-only.
- Charts: custom muted palette; no rainbow defaults.

Folder organization

```
src/  
  app/  
    components/  
      brand/  
      layout/  
      navigation/  
      capability/  
      evidence/  
      passport/  
      charts/  
      forms/  
  design-system/  
    tokens.ts  
    theme.css  
    component-guidelines.md  
  lib/  
    cn.ts  
    accessibility.ts
```

Component naming

Use domain-aligned names: CapabilityCard, EvidenceCard, PassportClaimCard, ConfidenceMeter, EvidenceTimeline, OntologyBreadcrumb, RecommendationReason, VerifiedSeal, GatewayPanel.

20. Final Deliverable

DESIGN-001 defines Syrka's permanent visual identity and design system constitution. It preserves the existing logo and expands its meanings into a complete design language for enterprise SaaS, universities, governments, employers, students, investors, official documents, dashboards, portfolios, and passports.

The final visual language is timeless, minimal, premium, trustworthy, evidence-driven, intelligent, institutional, calm, and explainable. Every future Syrka interface should feel like it belongs to the same ecosystem: an open gateway from knowledge to verified capability and opportunity.
