

# Syrka

NATIONAL HUMAN CAPITAL INTELLIGENCE

---

From National Vision to Human Capital Reality

# The Problem

Every country has a national vision. Almost none have a system to deliver it through human capital.

338,000

workers Saudi Arabia needs in Tech by 2030

Currently on track to deliver: 142,000

33,600

workers Malta needs in Digital Economy by 2050

Currently on track to deliver: 18,400

Both off track. No system exists to close the gap.

# The Gap No One Is Closing

## Governments

Know where they want to go. Have no system to connect national vision to workforce reality.

## Universities

Teach what they always taught. No signal telling them which courses to change or why.

## Employers

Cannot find the talent Vision requires. Graduate skills mismatch costs billions annually.

---

Palantir for government human capital.

# Syrka

A SELF-REINFORCING NATIONAL WORKFORCE ENGINE

We take a nation's vision — Saudi Vision 2030, Malta Vision 2050 — and map the delta between where they are today and where they need to be. AI against government and OECD data identifies exactly which skills the nation lacks, sector by sector. Those signals flow into universities, optimising curricula so every graduating cohort is calibrated to what the economy actually needs. The placement layer connects high performing students directly to employers in national priority sectors.

# Live at syrka.co

Two countries. Real data. Real AI analysis.

LIVE

## Ministry Dashboard

National gap visualisation. Sector by sector workforce delta. Policy intervention simulator with AI-generated cost and feasibility analysis.

LIVE

## University Intelligence

Course-by-course curriculum alignment scores against national vision targets. KAUST BSc Computer Engineering: 54.44%. Specific module recommendations generated by AI.

LIVE

## Policy Simulator

Model any intervention — bootcamp programmes, immigration fast-tracks, curriculum reform. AI returns gap closure percentage, cost estimate, and ministerial summary in seconds.

Built in one week. Seeded with real government data.

# Where We Are

## PRODUCT

- Live at syrka.co — two countries fully operational
- Real Supabase database — 400+ students, 30+ institutions, 26 skills seeded
- DeepSeek AI generating real policy analysis and curriculum scores
- Policy intervention simulator running live scenario modelling

## MINISTERIAL ACCESS

- Deputy Prime Minister of Malta (LinkedIn network)
- Minister for Foreign Affairs and Tourism, Malta
- Public Investment Fund (PIF), Saudi Arabia members
- NEOM Authority — General Counsel, COO, Legal Director
- OECD economists, World Bank education specialists

*Network not yet activated. Waiting for product to be demo-ready. That moment is now.*

# The Market

140+

Countries with active national development plans

\$47B

Global govtech market by 2028

\$700B

Saudi PIF mandate — Vision 2030 execution budget

## GO TO MARKET

B2G ministerial pilots. One country contract funds the next. Malta as EU reference case opens 26 member states. Saudi as Gulf reference case opens MENA region.

## BUSINESS MODEL

Government SaaS — annual platform licence per country. Implementation and data integration fees. Policy advisory layer for ministries. University subscription tier.

# The Ask

## Tahir Mahmood Khan

Founder & CEO, Syrka

- PPE Student, Charles University Prague
- Founder, DPIIT-recognised startup — India & Dubai
- Strategy & Policy Advisor, Legislative Assembly of Manipur
- Intern, EY Sustainability Advisory — carbon credit market design
- Intern, Supreme Court of India
- Samvay Mentorship Programme, Embassy of India Prague

## Pre-Seed

To fund the first government pilot

### USE OF FUNDS

- Malta ministerial pilot — 6 months
- Methodology validation with academic partner
- Technical co-founder recruitment
- Saudi Vision 2030 government outreach
